

API PLAN - 75

- Double mechanical seal tandem arrangement
- Containment seal chamber drain for condensing leakage on arrangement 2 seal.
- Pump fluid condenses at ambient temperatures.
- Valves to be installed for operator use, relative to ground clearance and other obstructions.
- Leakage collection for zero to very low process emissions.
- Safety indicator for primary seal.
- May be used alone or with Plan 72 on containment seals.
- Fluids that condense at ambient temperature.
- High vapor pressure fluids, light hydrocarbons.
- Hazardous / toxic fluids.
- Clean, non-polymerizing, non-oxidizing fluids.
